Add Efficiency with Edson's Case Management Solutions in Booth C-3833 at Pack Expo 2023

Edson is drawing on its more than 60+ years of packaging expertise to help automate RPC erecting and product settling. See live demonstrations in booth C-3833 at PACK EXPO 2023

HAMILTON, Ontario, July 12, 2023 – Edson, a ProMach brand, is taking its decades of proven case packing expertise and applying it to help automate other parts of the packaging process. Edson will be demonstrating its strengths with RPC erecting and automatic product settling in booth C-3833 at PACK EXPO 2023, September 11-13, at the Las Vegas Convention Center.

Edson has been an industry-leading manufacturer of case and tray packing solutions for the converted paper, diaper, and nonwoven markets for decades. Now, they're utilizing their automation expertise to help other industries.

The **RP-200 Fully Automatic RPC Erector** uses high speed servos to accurately and consistently form trays, making it an ideal solution for produce, protein, and several other industries that use RPC style trays.

The RP-200 is a compact machine that takes up very little floor space. It can be easily moved within a facility or to different locations where the work is centered. This is especially helpful in the produce industry where picking and processing is seasonal and tends to occur in different locales.

The machine features an ergonomic easy load, single feed-in magazine to facilitate fast loading with minimal handling. The RP-200 can accommodate both standard and custom tray sizes with speedy, easy changeovers.

Edson will also be showcasing their **WRC Rotary Case Settling Conveyor**, which is designed as an on-the-go settling solution that simultaneously transports and settles cases. The advantage the WRC brings to customers is an all-in-one settling and conveyance solution that can transport up to 100 cases per minute without slowing production. The machine brings added versatility as it can operate as a standard conveyor with the settling function turned off. The compact WRC is available with either a 3 or 6-foot-long option.

To see how the **RP-200 Fully Automatic RPC Erector** and the **WRC Rotary Case Settling Conveyor** can add speed, efficiency, and safety to your packaging process, visit Edson in booth C-3833 at PACK EXPO 2023, September 11-13, at the Las Vegas Convention Center.

About Edson

Tissue converting companies across the globe know Edson for their high-performance case and tray packing systems, including high-speed horizontal case packing, product handling, and top-load robotic solutions. Respected for their performance and reliability, many Edson machines from the 1970's are still in service today. As part of the ProMach End of Line business line, Edson helps our packaging customers protect and grow the reputation and trust of their consumers. ProMach is performance, and the proof is in every package. Learn more about Edson at www.Edson.com.

About ProMach

ProMach is a family of best-in-class packaging solution brands serving manufacturers of all sizes and geographies in the food, beverage, pharmaceutical, personal care, and household and industrial goods industries. ProMach brands operate across the entire packaging spectrum: filling and capping, flexibles, pharma, product handling, labeling and coding, and end of line. ProMach also provides Performance Services, including integrated solutions, design/build, engineering services, and productivity software to optimize packaging line design and deliver maximum uptime.

ProMach designs, manufactures, integrates, and supports the most sophisticated and advanced packaging solutions in the global marketplace. Its diverse customer base, from Fortune 500 companies to smaller, privately held businesses worldwide, depends on reliable, flexible, technologically advanced equipment and integrated solutions. ProMach is headquartered near Cincinnati, Ohio, with manufacturing facilities and offices throughout the United States, Canada, Mexico, Brazil, Europe, United Arab Emirates, and China.
